274 Savary Road, Silver Lake, NH—603.367.8419

2022 CATALOG

EGGPLANT, PEPPERS, TOMATOES AND RELATIVES

A wide ranging selection of the garden “nightshades”. Including for the first time this year, a selection of heirloom tomatoes grown from seed grown and saved by Hope at Tanna Farm in Tamworth. You know those seeds are well adapted to our climate!

Returning your empty plastic containers enables us to keep prices lower. We will clean and reuse the following year.

For pricing, see the separate 2022 Price List.

Individual plants available in 4.5 to 5” pots — fully hardened off and ready to plant in your garden.

When the plants are well established, mulch to retain water if needed, retard weeds and keep leaves clean. Fertilize with a good organic fertilizer. Drip irrigation or soaker hoses help to keep the foliage dry.

A healthy plant is better able to resist pests and diseases! Happy Growing!

Ping Tung

Asian

70 Days A

Easy-to-grow Asian eggplants are long and slender with tender magenta skin. Productive plants yield up to 20 fruits each and are vigorous and stress tolerant. Slim fruits average 1-2" wide; plants should be staked for straight fruit. No peeling required! Compact habit.

EcoGrow

Black Beauty

65 Days A

Classic Italian eggplant with high yields and no spines. Blocky, nearly black bell-shaped fruits have a slight signature ribbing. Medium to thick skin is deep purple and glossy when mature. Compact plants benefit from staking to support heavy yields of large 5-6" fruits.

EcoGrow

Diamond

Dark Purple

70 Days A

A standout as a very prolific early producer; yields as well as hybrids. Slender, attractive dark purple fruit hang in clusters for easy picking. Fruit has mild flavor with no bitterness and a fine, creamy texture. Great choice for eggplants in a short season or for those looking for a high quality OP variety. Highly productive.

EcoGrow

Little Fingers

60 Days A

Slender, petite eggplants fantastic for grilling. Dark purple skin is thin and tender. Flesh has a silky texture with few seeds and mildly sweet flavor needing very little cooking time. Harvest when fruit is young and glossy. A great variety for large containers! Early and productive.

EcoGrow

Listada di Gandia

Italian

85 Days A

Stunning magenta-striped Italian eggplant for a beautiful display. Very productive plants produce abundant tender, delicious fruits with unusually thin skin. Egg-shaped petite 3-5" fruits fit in the palm of your hand and are great for smaller portions. Holds its color even at large sizes.

EcoGrow

Rosa Bianca

75 A

Pink and white Italian heirloom. Round, 4-6" long by 5-7" diameter fruit streaked with white and violet. Plump and variably ribbed. Mild, creamy taste. This traditional Italian variety is best adapted to regions with warm nights. Expect lower yields in cool areas. Green calyx.

EcoGrow

Pure White F1

White

75 A

Asian eggplant features beautiful elongated cylindrical curved 1x12½" off-white fruits.

EcoGrow

274 Savary Road, Silver Lake, NH—603.367.8419

Corno di Toro

70 Days A

Large, highly attractive scarlet, tapering 6-8" fruits are long and narrow, often with the bull horn curve for which they are named. Quickly turns gold and then a beautiful deep crimson color with sweet, full-bodied flavor when fully ripe. Versatile and great for eating raw, stuffed, grilled or traditionally fried in olive oil and sprinkled with parmesan. Plants are vigorous with an excellent upright habit. Personally, I love these peppers for their size, flavor and the thickness of the chili pepper walls. They are ideal for roasting and the thickness makes them slightly meaty.

Frying

EcoGrow

Shishito

60 Days A

Small, mild Japanese pepper for roasting, pan-frying and grilling. Thin walls blister and char easily when roasted or grilled, taking on rich flavor that is delicious with coarse salt and lemon juice. Pepper lore has it that the occasional fruit will display heat. Typically harvested and used green, but eventually turns orange and red with sweeter flavor. Prolific! Spreading habit.

Frying

EcoGrow

Anaheim, NuMex Joe E.

70 Days A

Southwestern style traditional Anaheim harvested green for stuffing, grilling, roasting or processing. Peppers average 8" long and have thick, crisp flesh with mild heat and excellent flavor. Very productive strain that quickly changes from green to red. Improved version of New Mexico 6-4 pepper, with thicker, longer fruits that mature earlier.

Hot

EcoGrow

Black Hungarian Spice

70 Days A

Highly ornamental and useful in the kitchen, the 4" long fiery fruits of this early-to-mature pepper resemble jalapeños, but are shiny black and eventually ripen to red. The prolific plants grow to 3' tall and produce green foliage highlighted by dark-purple veins alongside beautiful purple flowers. A good substitute for jalapeños. Medium hot.

Hot

EcoGrow

Cayenne, Ring-o-Fire

60 Days A

Ring-O-Fire is an improved cayenne that matures earlier and has a glossy sheen with a fire engine red color. Prolific and dependable plants reach heights of 18" tall and produce loads of thin-skinned 4" fruits, great for eating fresh, dried or powdered. Heat is more mild than other cayenne varieties, resulting in peppers that are excellent for fresh preparations.

Hot

EcoGrow

Early Jalapeno

65 Days A

Prolific yields of flavorful blunt fruits with distinctive jalapeno flavor. Small, moderately spicy fruits with thick walls are traditionally harvested dark green but can be allowed to ripen to red. A classic eaten fresh or pickled with Mexican dishes! Compact plants are sturdy and work well in containers.

Hot

EcoGrow

Ghost

110 Days A

Ghost Pepper / Bhut Jolokia is one of the hottest peppers in the world with 350,000-1,000,000 Scoville units. The peppers are 2 1/2 – 3" long and are green ripening to red. They have a long, narrow shape and a complex taste. The plants are very slow growing when young.

Hot

EcoGrow

Hungarian Hot Wax

70 Days A

Long, banana-shaped waxy pepper used for frying, stuffing and pickling. Ripens from pale yellow to deep golden orange and finally cherry red, but traditionally harvested light green and used for pickling. May be harvested at any stage but heat intensifies as peppers mature. Very productive even in cool weather. Heat varies among strains; HMOS strain is spicy

Hot

EcoGrow

Jaluv An Attitude Chili

75 Days A

An extremely wide-topped, thick-walled jalapeño-type hot pepper. Bred for productivity and vigor at northern latitudes. The ultra-thick walls make for great body in salsa and other preparations.

Hot

EcoGrow

Poblano - Ancho

68 Days A

Mild heart-shaped chili perfect for stuffing in chiles rellenos or dried for ancho chili powder. Stout dark green fruits are moderately spicy with medium-thick walls. Referred to as Poblano when used fresh and Ancho when dried for seasoning. Plants are well branched. Well adapted variety; good yields in cool conditions.

Hot

EcoGrow

Certificate #300-By NH DeptAgr,Mkts&Food

274 Savary Road, Silver Lake, NH—603.367.8419

Poblano - Bastan

Hot

65 Days A

Early and adaptable poblano pepper. Sturdy, upright plants produce high yields of uniform, 5" smooth, mostly two-lobed fruits. Bastan's fruits may be used at the green unripe or brown ripe stages. Excellent fried, roasted, or in chile rellenos.

EcoGrow

Red Habanero -

Hot

70 Days A

Bright red, glossy fruits with outstanding appearance, flavor and burn in taste tests. Peppers are lantern-shaped, longer and more slender than a typical habanero. Extremely hot fruits are abundant and average 3-4" long, with early maturity and good productivity in cool climates.

EcoGrow

Scotch Bonnet

Hot

95 Days A

Scotch Bonnet Orange pepper is too hot to handle!!! This variety is for serious Chile heads, the heat registers over 100,000 Scoville units. Peppers are green before ripening. They are 2" long by 2" wide. Plants are very productive. Scotch Bonnets are the most popular of the Caribbean peppers.

EcoGrow

Yellow Habanero

Hot

95 Days A

"Heat registered in BTU's!" Yellow habanero is a late maturing pepper that has fruits with thin walls and a lantern shape averaging 2" x 1" and the rare combination of great taste and substantial heat. The heat is ranked at Level 4 on my Heat Scale. It grows on a tall plant and is the most beautiful pepper in the garden. The golden 2-inch pepper turns into a deep, sun-colored gold color. It will ripen from green, yellow, to a deep orange-gold when mature. It is used mainly raw because it loses subtlety, but not the heat when it's cooked.

EcoGrow

Boldog Hungarian Spice

70 Days A

Open-pollinated. The Boldog from Hungary that doesn't bite but does dry nicely with a hint of spiciness. A prolific bearer of 4-6" long wrinkled tapered pendant fruits. Enjoy fresh, although skins are a little tough, or roast and peel for delicious additions to pizza, pasta or stew. Pick red, dry and grind into sweet paprika or string into decorative ristras. Boldog sets enough fruit to accommodate all uses. The town of Boldog is in a well-known spice-pepper district northeast of Budapest.

EcoGrow

Paprika

Papri Plus

80 Days A

Papri Plus is perfect for making paprika at home. Simply cut the peppers in half, remove the seeds, and dry the peppers. Once they are dry, break them into small pieces to fit in a spice grinder. Fruit average 6 inches in length and 1 1/2 inches in width. Maturing from green to red, paprika is better made from red peppers which are more flavorful. These peppers taste great fresh too. Almost no heat. 70 days to green fruit and 80 to 85 days to red.

EcoGrow

Paprika

Sheepnose

70 Days A

Before bell peppers began to dominate sweet pepper offerings, people grew more pimento peppers for their meaty, sweet flesh and thick walls. This Ohio family heirloom could convince you to try them again. The fruit has a rich, aromatic flavor that is great for eating fresh, roasted, cooked, or canned. They are sturdy, 2 1/2 inches long and wide, rounded and ribbed with few seeds. Easy to grow with big yield potential.

EcoGrow

Pimento

Goddess F1, Banana

63 Days A

Sweet banana for pickling or fresh eating. Long, thick-walled, smooth fruits are borne on large plants. Avg. 8-9" long, the fruits are mild when yellow and moderately sweet when they ripen red. Best for pickling due to their mild flavor, but also suitable for fresh market. Widely adapted. High resistance to bacterial leaf spot races 1-3.

EcoGrow

Sweet

California Wonder

65 Green A

Large, blocky, thick-walled glossy fruit that turns red quickly under a range of conditions. Upright, everbearing habit keeps fruit high on 24-30" plants. Suitable for shipping and freezing. Introduced by Burpee's in 1928 and still a hit today. Strong field resistance to tobacco mosaic virus.

EcoGrow

Sweet

Iko Iko

65 Days A

Spectacular array of colors in a high yielding bell pepper. A rainbow of colors from a single variety! Immature fruits start dark purple, lavender, pale yellow and occasionally lime green, ripening to tangerine and red streaked with purple. Upright habit. Good leaf cover.

EcoGrow

Sweet

MiVida Gardens Certified Organic Seedlings
Certificate #300-By NH DeptAgr,Mkts&Food
274 Savary Road, Silver Lake, NH—603.367.8419

King Crimson

60 Days A

Early, prolific peppers are medium-sized and blocky with four lobes and thick walls. A favorite due to early maturity and uniform size. Slightly later than King of the North, with superior quality, uniformity and intermediate resistance to CMV.

Sweet

EcoGrow

King of the North

57 Days A

Reliable set of green to glossy red fruits in short seasons. Improved for a higher percentage of blocky, thick-walled, early ripening peppers each with three to four lobes. Known for its ability to produce good sized peppers in short, cool seasons. Strong plants support heavy yields. Early. Upright habit.

Sweet

EcoGrow

Roulette F1

85 Days A

A 2018 All-America Selections winning habanero that has no heat. It offers all the flavors of a traditional habanero, but it will not trouble those who can't eat a hot pepper. In addition, the variety is early-maturing and produces up to 100 peppers per plant. Fruit matures to a brilliant red. 85 days.

Sweet

EcoGrow

Lively Orange

80 Days A

Thick-walled, bright orange fruits make a beautiful OP display when combined with Stocky Red Roaster and Lively Italian Yellow. Impressed us with its ability to set fruit, size up and ripen; large plants loaded with fruit competed well with hybrids in northern Vermont trials. Bred by Tom Lively of Eugene, OR and further selected by High Mowing.

Sweet

EcoGrow

Lively Yellow

75 Days A

Stunning sweet, thick-walled yellow fruits. Large, tapered golden yellow fruits with sweet, juicy flesh on vigorous plants. Prolific and reliable, performing well in the open field across a variety of climates and ripening well even in our northern areas. Italian-type. Vigorous, upright habit.

Sweet

EcoGrow

Picnic red

78 Days A

The red picnic pepper has unbelievable sweetness, and a rich complex flavor that makes them addictive. Bred with an emphasis on flavor, yields and plants that stand up straight for easy harvest.

274 Savary Road, Silver Lake, NH—603.367.8419

Ambrosia

100 A

A vigorous annual in the Northeast bearing yellow fruits the size of cherry tomatoes on bushes 3–4' tall and wide. Begin picking fruit in the fall as the husks around the fruit dry completely. The fruit lasts unrefrigerated for weeks in the husk. Cape gooseberries are larger and more tart & citrusy compared to ground cherries.

EcoGrow

Cape Gooseberry Aunt Molly's

75 Days A

Sweet, tropical-tasting gold berries wrapped in paper husks add magic to your garden. Bushy spreading plants grow 2.5-3' tall. When ripe, the husk around the fruit becomes papery dry and the fruit falls off the plant to be picked up from the ground. Some people place a tarp underneath the plants to make harvesting easier, but either way the husks keep the fruit clean. Trellis or let sprawl.

EcoGrow

Ground Cherry

Toma Verde

60 Days A

Early variety with tart flavor when young, becoming sweeter as it ripens. Medium to large size fruits are ready to harvest when husks split and fruit color changes from a yellow green to medium green. Perfect for Salsa Verde or as a special addition to any Mexican dish.

EcoGrow

Green

Purple Blush

80 Days A

Rare purple tomatillo with exceptional appearance and excellent distinctive taste. Much sweeter than the green types with superb flavor eaten fresh from the plant, grilled or in salsa. Deep violet skin color bleeds into bright green interior flesh. Harvest after the papery husk has split, when fruits are golf ball-sized and skin has turned purple.

EcoGrow

Purple

274 Savary Road, Silver Lake, NH—603.367.8419

Black Brandywine (Weavers)

80 Days A

This exceptional potato-leaved variety is from William Woys Weaver. Bred sometime in the late 1920's by Dr. Harold Martin, a dentist, who was also an amateur seed breeder. He is equally famous for his extremely large-seeded pole lima bean. Heavy yields of 1 pound black beefsteak tomatoes. Excellent flavor. Indeterminate, 80 days from transplant.

EcoGrow

Beefsteak

Kellogg's Breakfast

85 Days A

Large orange beefsteak fruits weigh 1-2 pounds. Delicious rich flavor with a good acid/sugar balance. Very productive. These beautiful fruits are a stand out in flavor, production and texture. The interior is a sunny bright color reminiscent of fresh squeezed orange juice with a taste like a barrel full of sunshine. The sweet, but tangy, flavor is a perfect balance for any use and the tomatoes are resistant to sunburn and blossom end rot, developing without blemish almost every time. Originally from West Virginia. Named by Darrell Kellogg of Redford, Michigan who received it from a friend

EcoGrow

Beefsteak

Pink Brandywine (Sudduth)

85 Days, (Hope) A

This Amish strain has been grown in Pennsylvania since the 1880's. Fruits can top 1 pound. Plants require good cages or staking. Not uncommon for one plant to produce 25-30 fruits per season. Indeterminate plants, 80-90 days from transplant.

EcoGrow

Beefsteak

Pruden's Purple

70 Days A

Early Brandywine type. Large to very large (many over 1 lb.) fruits are flattened and smooth (except for shoulder ribbing on some), and resist cracking. Vivid dark-pink skin with crimson flesh. Medium-tall, potato-leaf plants. Indeterminate.

EcoGrow

Beefsteak

Woodle's Orange

75 Days, (Hope) A

This sweet Iowa heirloom has become a favorite of many gardeners. This brilliant tangerine colored tomato has a very rich & complex flavor. Great choice for a market tomato. Fruits are round and the size of a baseball and weight 10-16 oz. Indeterminate, 75 days from transplant.

EcoGrow

Beefsteak

Bing

65 Days A

Exceptional rich flavor. What sets Bing apart is that every single plant has exceptional flavor, not only the occasional one. Fruity and sweet with perfectly balanced acid, in clusters of 1" fruit. Does best in hot and dry conditions, as the thin skin will crack with sudden rains. Harvest more frequently in wetter conditions.

EcoGrow

Cherry

Black Cherry

64 Days A

Round, full-flavored cherry with distinctive purple-black color. One inch fruits with the juicy, meaty texture and sweet, rich flavor characteristic of all Russian black tomatoes. A striking addition to cherry tomato mixes. Very productive plants. Prolific.

EcoGrow

Cherry

Esterina F1

60 Days A

An excellent organic alternative to Sungold F1, with sweeter flavor, excellent crack resistance and brighter yellow color. Vigorous growth that can withstand disease pressure makes this variety a versatile standout.

EcoGrow

Cherry

Peacevine

75 Days A

A de-hybridized selection of Sweet 100, known for its incredible flavor and resistance to cracking. Produces impressive numbers of uniform bright crimson 1" tomatoes. Very high in Vitamin C and amino acids.

EcoGrow

Cherry

Sun Gold

57 Days A

F-1 hybrid. To quote one customer, "Without these little babies, there's no summer." A perfect combination of deep sweetness with a hint of acid tartness. What is its elusive alluring tang? Quart after quart grace the table, yet we rarely reach surfeit July through September. Small fruits averaging 8.2g, borne in prolific clusters, ripen very early to a rich apricot color and keep producing till frost. Very prone to split so pick early when rains are forecast. Brix 8.

EcoGrow

Cherry

MiVida Gardens Certified Organic Seedlings

Certificate #300-By NH DeptAgr,Mkts&Food

274 Savary Road, Silver Lake, NH—603.367.8419

Supernova

63 Days A

Supernova impresses with both aesthetics and flavor. A marbled mini-Roma shape with constellations of yellow stripes on a red flesh background. Fruit holds well. .25-.5 oz. Indeterminate.

Cherry

EcoGrow

Sweetie

65 Days A

Super sweet red cherry tomato with high sugar content for eating right off the vine! Masses of 1-1.5" round cherries in long clusters. Firm texture similar to grape tomatoes; ideal for eating fresh or canning. Impressive vigor and reliability, ripening first and perfectly even during six weeks of rain and cold - an absolute standout! Vigorous.

EcoGrow

Micro-Tom

85 Days A

'World's smallest tomato variety,' developed by Drs., J.W. Scott and B.K. Harbaugh at the University of Florida. Grows 5 to 8 inches tall in a 4 inch pot bearing flavorful miniature tomatoes about the size of salad croutons. Plants are truly diminutive and wonderful for patios, windowsills or garden borders. Determinate. 85 days from seed.

Container

EcoGrow

Patio

70 Days A

This dwarf variety is one of America's most popular varieties ever for growing on patios, decks, courtyards, or wherever garden space is limited. Plants have attractive, deep green foliage and only become about 2 ft. tall, but produce large harvests of bright red, 3 to 4 oz. flavorful tomatoes. Outstanding for growing in containers -- one that measures at least 12 inches wide works best. Beautiful plant.

EcoGrow

Tumbler

50 Days A

Specially bred for hanging baskets. Bushy plants have pliable stems, and look fantastic when mixed in containers with Lobelia or Ivy. Sweet, bright red fruits. Bite-size tomatoes have a sweet flavor for fresh eating. Try them sautéed and served over pasta, too!

Container

EcoGrow

Flaming Burst

70 Days A

Open-pollinated. Indeterminate. 1¼ x 1" golden mini pears cluster on a steadily producing plant. Meaty but not dense; juicy and sweet but tangy. Delivers the correct culinary combination that so many insipid yellow cherries and pears lack.

EcoGrow

Moonbeam

68 Days A

Glowing white, translucent grape tomato with oblong frame and delicious, fruity bite. This remarkable tomato has dramatic visual appeal and packed with a tasty punch of unbeatable flavor. Ideal for the tomato grower seeking a fruit with both style and exceptional eating quality. .4 oz fruit. Indeterminate.

Grape

EcoGrow

Black Plum

80 Days A

Small elongated-oval fruits are deep mahogany and sweet and fruity. These are small, teardrop-shaped morsels of sweetness, wonderful for snacking off the vine or for adding to salads. Preferred by some for making sauces. 6-foot tall plants produce a steady, large crop. This is a unique and very tasty variety. One of the best yielders for both fresh market and home use.

EcoGrow

Gilbertie

85 Days A

Long, slender shape with characteristically green shoulders and a slight crook in the neck. Narrow fruits average 7" long with very solid, richly flavored flesh that makes excellent sauces and soups. Very small seed cavity.

Paste

EcoGrow

Opalka

83 Days A

Expect copious yields of 3x5" massive solid bull's horn-shaped red fruits with dry texture and few seeds. Also dries well. While some tomatoes falter during hot dry spells, Opalka produces consistently. The crinkly foliage is normal and not an indication of plant disease. Polish heirloom brought by the Opalka family to Amsterdam, NY, around 1900. A shy seed producer for seed savers. Fruits are far richer and more flavorful than most paste tomatoes.

EcoGrow

Roma

Paste

Roma, Martino's

Paste

65 Days A

Productive plum tomato with great disease resistance! Vigorous and strong, producing heavy yields of picture-perfect, thick-walled fruits with deep red color and mild flavor. A good choice in the garden. Vigorous

EcoGrow

75 Days A

Italian variety with pretty rugose (puckered) foliage. Very heavy set of mild 2-3 ounce fruits perfectly suited for making sauce, salsa, and paste. Tends to fall off the vine when fully ripe. Determinate, but requires trellis, Fruit ripens over 2 week period - good for processing.

EcoGrow

San Morzano type

Paste

Jaune Flamme

Salad

80 Days A

Classic Italian favorite with high yields; excellent richly flavored tomato for preserving. Prized for its firm pulp, low seed count and easily-removed skin. Medium-sized fruits are slightly larger than Roma but smaller than Gilbertie and Amish. Resists cracking and holds well both on the vine and in storage. Heavy yields of 4 oz fruit with few seeds.

EcoGrow

75 Days A

Prolific French heirloom that will set your heart on fire with its sweet, fruity flavor. Like a grown-up Sungold with larger apricot-sized fruits. 1.5-2" fruits hang in neat clusters. A terrific salad tomato that is also great for sauces and for drying. Versatile, Prolific.

EcoGrow

Arbenaski

Slicing

Better Bush

Slicing

70 days, (Hope) A

Slightly flattened red fruit from 180 to 250 grams. In a bouquet of 3 to 4 fruits. Ribbing at the top. Strong depression at the peduncular attachment. Umbilical in turban. Sensitive to cracking. Plant 50 to 70 centimeters in height. 70 to 75 days. Indeterminate growth. Mid-season variety. Very old variety.

EcoGrow

68 Days A

Perfect for large containers or small gardens, this has long been a favorite choice for growing on patios, decks, and balconies. That is because the compact plants are attractive while yielding good-sized 8 oz. fruit with real tomato flavor. Stocky plants grow 3 to 4 ft. tall with an upright habit, making staking needs minimal.

EcoGrow

Black Brandywine

Slicing

Black Prince

Slicing

85 days A

The origin of this tomato is believed to be from Dr. Harold Martin, who was a hobby gardener and a dentist. He did not release the tomato in the 1920s when it was first selected, but it was released later by a person who inherited Dr. Martin's collection. Initially there were some concerns about the variability of the variety, and it has taken time for people to judge the plant. It is indeterminate and purple-maroon in color, weighing 5 to 8 ounces. It has a sweet fruity flavor. The current selection from the collection is a regular leaf type.

EcoGrow

75 Days A

Open-pollinated. Indeterminate. Coming to the U.S. by way of Irkutsk, Siberia, these iridescent 5-7 oz garnet-colored globe-shaped fruits are among the most uniformly handsome in the tomato kingdom. This prince has earned a reputation for outstanding flavor similar to that of Black Krim, but without Krim's fragility and tendency to crack. A superior reliable heavy-yielding home-garden tomato.

EcoGrow

Cosmonaught Volkov

Slicing

Green Zebra

Slicing

68 Days A

Wins every taste competition with its rich complex flavor! Sweet and tangy fruits are slightly flattened with a healthy red color and moderately green shoulders. Prone to cracking in wet conditions, but not nearly as much as Brandywine. Originally from Ukraine; produces high yields even in cool conditions. Works well in low tech tunnels.

EcoGrow

75 Days A

Popular succulent green fruits with sweet and zingy flavor. Medium-sized fruits start out pale green with dark green stripes that soften and turn yellow when ripe. Perfect exteriors; fruits hold up under adverse conditions and rarely crack. Grows well in the greenhouse, too!
